Nano Studies is a biannual scientific journal published in Georgia.

Nano Studies' topics of interest include Nanoscience and related problems of Physics, Chemistry and Materials Science.

Nano Studies publish following categories of scientific articles: research papers, communications, reviews and discussions.

Nano Studies publish scientific articles in English and also in Georgian and in Russian.

English summaries of all the articles of **Nano Studies** are referred in **Georgian Abstracts Journal** and their full-texts are free-accessible in **Tech Inform** (Georgia's Central Institute for Scientific and Technical Information) database:

www.tech.org.ge

www.tech.caucasus.net

Editor:

Levan Chkhartishvili

Editorial Assistance:

Tamar Berberashvili

Articles included in present volume are published by financial support of the GNSF (Georgia National Science Foundation), Grant GNSN/ST 08/4-411. Any idea in these publications is possessed by the authors and may not represent the opinion of the Georgia National Science Foundation itself.

CONTENTS

Nonequilibrium Treatment of ZnO Layers Implanted by N T. Butkhuzi, M. Sharvashidze, T. Khulordava, E. Kekelidze, N. Gapishvili, L. Aptsiauri, N. Bukhsianidze, L. Trapaidze, R. Melkadze, Sh. Mirianashvili, T. Qamishadze, L. Gapishvili, M. Tigishvili.	5-9
Regulation of defect creation in ZnO p-type films by RBQE method T. Butkhuzi, M. Sharvashidze, T. Khulordava, E. Kekelidze, N. Gapishvili, L. Aptsiauri, N. Bukhsianidze, L. Trapaidze, R. Melkadze, L. Gapishvili, M. Tigishvili, Sh. Mirianashvili, T. Qamushadze.....	11-18
Originality of technological processes of RBQE method T. Butkhuzi, T. Khulordava, M. Sharvashidze, E. Kekelidze, N. Gapishvili, L. Trapaidze, L. Aptsiauri.....	19-25
Characters of native defects in p-type ZnO T. Butkhuzi, M. Sharvashidze, T. Khulordava, N. Gapishvili, E. Kekelidze, Kh. Gelovani, L. Aptsiauri, N. Bukhsianidze, Sh. Mirianashvili, T. Qamushadze L. Trapaidze, R. Melkadze, L. Gapishvili, M. Tigishvili.....	27-33
Investigation of ZnS and ZnO compounds implanted by S ions T. Butkhuzi, M. Sharvashidze, T. Khulordava, N. Gapishvili, E. Kekelidze, Kh. Gelovani, L. Aptsiauri, N. Bukhsianidze, Sh. Mirianashvili, T. Qamushadze, L. Trapaidze, R. Melkadze, L. Gapishvili, M. Tigishvili.....	35-41
Preparation of Ho₅Sb₃ thin films and their electro-physical properties Z.U. Jabua, I.L. Kupreishvili, A.V. Gigineishvili, T.L. Bzhalava	43-46
Physical nature of size-dependence of nano-particles properties (in Georgian) A. Gerasimov	47-96
Scattering of electrons in n-Si crystals irradiated with protons by nanoscale inclusions T.A. Pagava, N.I. Maisuradze	97-102
Atoms constituting nanosystems: Quasi-classical parameterization for binding energy and electronic structure calculations L. Chkhartishvili, T. Berberashvili	103-144
Large enhancement of the thermoelectric figure of merit in a ridged quantum well A. Tavkhelidze	145-154
Observation of new quantum interference effect in solids A. Tavkhelidze, A. Bibilashvili, L. Jangidze, A. Shimkunas, Ph. Mauger, G.F. Rempfer, L. Almaraz, T. Dixon, M.E. Kordesch, N. Katan, H. Walitzki	155-160

To the non-thermal mechanism of melting of thin layers of semiconductors N.D. Dolidze, Z.V. Jibuti, B.E. Tsekvava.....	161-165
About nature of deformation pressure in germanium thin layers implanted by B⁺ ions N.D. Dolidze, Z.V. Jibuti, G.S. Narsia, G.L. Eristavi.....	167-171
Summaries	173-178
